- CSS, SCSS
- Tailwind css
- Bootstrap
- JAVASCRIPT
- REACT-JS
- Redux toolkit
- WordPress
- Firebase
- Mongodb , expressjs ,nodejs
- Version control:Git/GitHub

INTERESTS

- I love to meet and interact with people of different personality.
- Playing Badminton

LANGUAGES

- English • Hindi

OBJECTIVE

Seeking a role to enhance and explore my technical knowledge in frontend which includes HTML,CSS,JS and React JS. I am eager to learn about back-end and overall how to work and get used to with work environment as well.

PROJECTS

Redux (fully functional Redux toolkit shopping cart project)

- Multiple items on the home page with ease-to-use cart management.
- Intuitive and user friendly cart interface with a clear display of selected items ,total no. of items and their total price .
- user can be easily added or remove products into future wishlist from that page user can be easily added it to cart page.
- Fully responsive design implemented using React js and Tailwind CSS

Hospital website (using HTML CSS JS and bootstrap)

- I created this website using pure HTML, CSS JAVASCRIPT and used bootstrap just for layouting.
- User friendly interface with intuitive designs
- Completely real world website with complexity in design.
- All the functionality I created using pure javascript only .

<https://github.com/Riyatyagi284/kainos-website-challenge>
In readme file I attached the output there for all site views .

Weather App

- Real time weather updates for the user's current location or any searched location.
- user friendly interface with intuitive search functionality and clear display of weather information.
- Technology used in this project is HTML,CSS,and JS.

GitHub Profile Detector

- Designed and developed a web app that allows user to search for developers on GitHub using their username.
- Utilized HTML,CSS and JS to create this Intuitive and user friendly interface.
- Implemented a dark and light mode feature for improved accessibility and user experience.

<https://riya-github-profile-detector-ktmd.vercel.app/>

Password Generator

- Create a website that generates strong and secure passwords with customizable features such as password length, character type preferences.
- utilized HTML, CSS and JavaScript to design a user friendly interface for password generation and a copy to clipboard functionality.
- Includes a password strength meter that rates generated password strength.

React (Blog Website)

- I made this website using Context API ,useEffect and useState Hook.
- Here,in this there are six pages and all six pages data updated dynamically .
- Also added a pagination functionality for improved user experience.
